

PERU NOTIFIED OF SEPTIC GRANT PROGRAM

The Municipal Officers of the Town of Peru have been notified that the Dept. of Environmental Protection anticipates that the Small Community Grant Program will be funded by the June Bond Issue for the 2010 year. If funded, this program may provide grants to municipalities to assist low to moderate income (up to \$40,000) property owners in correcting malfunctioning septic systems which pollute water bodies or cause a public nuisance. The grant may pay from 25% – 100% of the cost of qualifying problems. Any resident having a failed/failing system, with these conditions, should contact the Town Office (562-4627 or townperu@roadrunner.com) for additional information as soon as possible. Grants are provided to Towns on a priority basis.
